As a results-oriented full-stack developer, I possess a strong foundation in web development technologies and a deep passion for creating innovative solutions. I am eager to leverage my acquired skills and experience to contribute effectively to a dynamic development team. I am seeking an opportunity where I can further enhance my expertise while delivering high-quality, user-centric software solutions.

Experience

Junior Full-Stack Software Developer

2024 - present

Building upon foundational skills acquired during the full-stack software development learnership at Capacititi, I am currently undergoing an enriching internship experience with ABSA Younglings. This internship provides an immersive environment where I delve deeper into the intricacies of modern web development, further honing my expertise in programming languages and frameworks.

My responsibilities include collaborating with cross-functional teams to design and implement scalable web applications, utilizing a diverse range of technologies such as HTML, CSS, JavaScript, Node.js, React.js, Python, and Java. Additionally, I have expanded my skill set by exploring cutting-edge frameworks and tools, enhancing efficiency and productivity in the development process.

Full-Stack Development Apprentice

2023 - 2024

- · Completed a comprehensive 6-month full-stack software development learnership, acquiring proficiency in various programming languages and technologies essential for modern web development.
- Gained hands-on experience and in-depth knowledge of programming languages including HTML, CSS, JavaScript, Node.js, React.js, Python, and Java, through intensive training sessions and practical assignments.
- Developed a solid understanding of front-end and back-end development principles, employing best practices in coding standards, version control, and project management methodologies.
- · Collaborated with peers and mentors on real-world projects, enhancing problem-solving skills, teamwork abilities, and adaptability in fast-paced development environments.
- Demonstrated proficiency in applying learned concepts to develop responsive and dynamic web applications, contributing to the successful completion of various software projects within the learnership duration.

Education

High School

2016

Cape Peninsula University of Technology

2020

- Bachelor of Science, Web Design, & Development
- GPA: 3.83

Skills

- JavaScript
- React.JS
- HTMl
- CSS

- Python
- Node JS
- Java
- Firebase
